- Fireplace features
- Tables
- Furniture tops
- Commercial signage
- House name plaques
- Commercial bar and counter tops.

### The Company

R.Lidster Ltd has been manufacturing and supplying natural stone products since 1975. These years of experience ensure that your project is handled professionally from start to finish.

With the combination of modern machinery and the expertise of the skilled mason, your kitchen, bathroom or living area can be completely transformed, creating a truly unique appearance, whilst adding value to any home.

### Turn your ideas to stone

From an idea to reality. Our technical staff can advise you on the suitability of your chosen material for the particular project in hand.

A variety of edge details and special features such as drainer grooves, recessed sink and drainer areas and inset heat strips can all contribute towards making your installation truly unique and personal.

The granites shown are all natural materials and have been selected for their suitability as durable worktop materials. Many other types are available but not all are suitable for the rigours of the busy kitchen environment. Advice will always be given on material suitability for your particular project.
